1. Star the repository

2. Watch the repository for any changes

3. Fork the repository

4. Clone your forked repository into your local machine

5. Create a new topic branch using the name, `yourStudentId-yourStudentName` format, For example: 610001-JohnSmith

6. Checkout your new branch

7. Add a new file with your name, example: your-name.html or `hello.js`

8. Commit the changes

9. Merge your `yourStudentId-yourStudentName` branch with the main branch

11. Push your changes to the remote repo

12. Create a new Pull Request to the upstream repo

Extra work:

1. Create a remote repository

2. Create `README.md` file

3. Add at least 5 markdown syntax (For example: Headers, Bold, Code, Unordered List, Links) [Use may use this Cheatsheet](https://github.com/adam-p/markdown-here/wiki/Markdown-Cheatsheet)
